

Alena Linhartová

Tasteful natural delight...

The sweetshop was started in 2007. Since then Betlém Elderflower Tea has reached big popularity among customers. That's why the offer has been enhanced by a shot of traditional Slivovice. Betlém Elderflower Tea is based on the traditional regional plant – elderflower-growing right in the garden of the sweetshop.

The sweetshop is situated in the historical centre of the City of Hlinsko – Betlém. Its customers can choose from fresh desserts, icecream, sandwiches, giftsets, both alcoholic and non-alcoholic drinks, mixed or selective drinks. Families with children will appreciate an outdoor seating with a playground and a sandpit.

The following products have been certified as "Hlinecko Quality":

- Betlém Elderflower Tea
- Betlém Elderflower Tea with Slivovice

Betlém Elderflower Tea is made from dried elderflower bloom that has been growing in the garden of the Sweetshop on the Stone Step for decades. Sweetshop is situated in charming ambience of Betlém, which is a part of the Folk Architecture Museum Vysočina. Dried elderflower blooms are infused for 10 minutes in boiling water and you can add beehoney that the sweetshop gets from local beekeeper.

Betlém Elderflower Tea with Slivovice is made in the same way, but there is one more special ingredient – Slivovice. Mainly in winter it's one of the biggest attractions for visitors.

In case of a family visit, parents can have Betlém Elderflower Tea with Slivovice and kids have an option of sweethoney from Hlinsko.

Elderflower has been known for ages. Its our original wood species that grows naturally everywhere including some gardens. Parts of this shrub belong to our favorite raw materials of folk medicine and not many people know that every part of this plant is able to heal. Young springshoots, flowers, fruits, bark, leaves and also root with the biggest concentration of healing substances. Because it's hard to get roots, dried blooms are more likely used for making tea. They work greatly against sore throat and respiratory diseases, such as flu, tonsillitis, cough, cold or bronchitis.
